Who we are

FTE is a proficient logistic service, specialising in full solutions of heavy haulage and special transportation, from any chosen port in the Middle East. Established in 1998 FTE has developed from a small enterprise into an international success, shipping an annual capacity of 100,000 tons globally. FTE is one of the Middle East's leading providers of heavy haulage and special transportation projects with a comprehensive fleet of transportation equipment.

What we do

We offer full project management solutions, managing every aspect involved in planning and moving heavyweight loads. We are constantly working on new innovative ideas, building on years of experience of working with a multitude of design complexities and regulations that vary with each individual project. We liaise with various officials, agencies and traffic management on behalf of our clients.

Heavy haulage service

Whether you have a specialised machine to be transported or a complete fleet of heavy vehicles to move, we can provide the transportation equipment to ensure your goods arrive at your desired destination efficiently. We have listed some example of the equipment and loads we work with:

- Abnormal & indivisible loads
- Extendable flat beds
- Desert road transport
- Low loaders up to 120 tons
- Semi-extendable trailers up to 90 tons
- High & wide load transport
- Girder trailers up to 400 tons
- Modular trailers up to 1000 tons
- Swept path analysis
- Extendable slats and wind turbine blade trailers up to 48 m
- Car carriers
- Transformers, generators and turbines (heavy electrical)

Heavy lift

We are highly experienced in heavy lift projects, handling heavy-lift cargo for oil refineries, power stations, bridges, trains and countless other projects. We use specialised equipment operating on forcible hydraulics.

Previous projects

Cargo:

Locomotives.
Dim: 16m x 3m x 4.3m.
Weight: 102 tons.

Route:

Dammam Seaport to Riyadh

Fleet:

Double Axle Tractor with 14 axle modular line.

Cargo:

8 Axle Mobile Crane.
Dim: 18m x 3.2m x 4.5 m.
Weight: 80 tons.

Route:

Dammam Seaport to Hail

Fleet:

Double Axle Tractor with 4 axle Hydraulic trailer.

Cargo:

Part of Rotatory Kin.
Dim: 10m x 6m x 6m.
Weight: 87 tons.

Route:

Dammam Seaport to Durma

Fleet:

Double Axle Tractor with 6 axle Hydraulic trailer.

Cargo:

Heat Exchanger.
Dim: 13.5m x 6.5m x 6.8 m.
Weight: 90 tons.

Route:

Jubail Seaport to Turaif

Fleet:

Double Axle Tractor with 8 axle Hydraulic trailer.

Cargo:

Cement Mill.
Dim: 20m x 4.5m x 4.5m.
Weight: 70 tons.

Route:

Jeddah Seaport to Jazan

Fleet:

Double Axle Tractor with 6 axle Extendable Hydraulic trailer.

Cargo:

Chemical Tanks.
Dim: 6.5m x 7.5m x 10 m.
Weight: 120 tons.

Route:

Dammam to Sadara Job site

Fleet:

Double Axle Tractor with 8 axle Hydraulic trailer.

Jacking and skidding

Hydraulic systems are the fastest, easiest and typically the only practical solution for the majority of lifting and moving stages. We have employees fully qualified, trained and experienced in working with these specialised pieces of equipment. We operate a synchronized jacking and skidding system in a safe and professional manner, whether lifting decks for bearing replacement, installing a transformer or supporting structures during concrete repairs. We have procedures in place to ensure safety regulations and pre-cautions are followed during all the projects we undertake.

We have had an outstanding success rate with the skidding of structures including bridge launches and pre-constructed structures using very precise techniques.

Custom clearance*

We work with national customs to offer a tailor made service suiting all clearance regulations and procedures. We provide custom clearance for all our clients arranging applications for duty, exemption preparation, chemical permits and attestation of documents (such as certificates of origin from chamber of commerce or embassies), ensuring a smooth process for your shipments throughout the transportation chain.

*Documented permission that the national customs authority grants to imported or exported goods so that they may enter or leave the country

Warehouse and supply chain management

We have a warehouse with 50,000 square metres of storage facilities suitable for all types of cargo in addition to a specialised tech team who are fully trained in our safe and efficient storage procedures.

We provide complete supply chain management including; storage inventory management, safely packing and storing all types of products from chemicals and metals to heavy cargo.
